Journal of Comparative Economics
Information for Authors

The *Journal of Comparative Economics* is devoted to the analysis and study of contemporary, historical, and hypothetical economic systems. Such analyses may involve comparisons of the performance of different economic systems or subsystems, studies linking outcomes to system characteristics in one economy or investigations of the origin and evolution of one or more economic systems. Empirical, theoretical, and institutional approaches are equally welcome. Empirical analyses should display appropriate sensitivity to the problems of comparing data generated by different economic systems and seek to employ methodologies that permit the researcher to distinguish between the effects of the system and of other causal variables on observed outcomes. Theoretical work that develops new ways of viewing economic systems and their operation or explains the behavior of systems or of agents within a system will also be considered for publication. Authors of technical papers are requested to provide a verbal explanation of their results as part of their conclusions. Although papers limited to the description of institutions will generally not be published by the Journal, such descriptions accompanied by the analysis of the interaction of the institution with the system are also welcome. The Journal is open to all viewpoints and ideologies. Nevertheless, authors should recognize that the Editor will not publish material that, in his opinion, cannot be expected to command the assent of the readership due to deficient or inadequate methodology.

It is the policy of the Journal to provide authors with an editorial decision within three months of the receipt of submissions.

Manuscripts should be submitted in triplicate to Professor J. C. Brada, Editor, *Journal of Comparative Economics*, Department of Economics, Arizona State University, Tempe, Arizona 85287-3806, U. S. A.

Manuscripts are accepted for review with the understanding that the same work will not be nor is presently submitted elsewhere; that its submission for publication has been approved by all of the authors; and that any person cited as a source of personal communications has approved such citation.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Any statements in the article once it is accepted by the Editor remain the sole responsibility of the author(s), including personal communications from other scholars. They represent only the opinions of the author(s) and should not be construed to reflect the opinions of the Editors, the Association, or the Publisher.

Manuscripts should be prepared according to the style rules outlined below. Deviation from these rules may cause publication delays.

Form of Manuscript. Submit manuscripts in English in triplicate, typed double-spaced on one side of 8½ × 11-inch white paper. All pages should be numbered. *Page 1* should contain the article's title, author(s) name(s) and affiliation(s) (name of institution, city, state and zip code); the complete mailing address of the author to whom proofs should be sent; and a suggested running head (abbreviated form of the title) of less than 35 characters. *Page 1a* should contain a short abstract of approximately 100 words for use in the *Journal of Economic Literature.*

List of Symbols. A complete list of symbols used in the manuscript must be included. All symbols should be identified typographically, not mathematically. This list will not appear in print, but it is essential to avoid costly author's corrections in proof. Distinguish between "oh" and "zero"; "ell" and "one"; "kappa" and "kay"; etc. All letters used as symbols will be set in italics unless a special type (e.g., Greek, boldface, script) is specified. Note that *if the equations are handwritten in the text, then the list of symbols should also be handwritten.*

Equations. All displayed equations should conform to the author's list of symbols and be typewritten, if possible, or neatly handwritten. All equations to which reference is made in the text should be numbered consecutively, with optional subdivision by sections; equation numbers should be placed in parentheses against the right margin.

Footnotes. Number footnotes consecutively, with superscript Arabic numerals, beginning with the article title. They should be typed double-spaced on a separate page.

Tables. Number all tables consecutively with Arabic numerals. Each table should be typed double-spaced on a separate page. All tables should have titles. If footnotes to the table are necessary they should be indicated by superscript italic letters, *a*, *b*, *c*, and should be typed immediately below the table. Indicate in the margins where you would prefer to have the table inserted.

Figures. All illustrations are to be considered as figures and should be provided as camera-ready copy. Number the figures consecutively; type their legends double-spaced on a separate page, not on the figures themselves. Plan figures to fit the proportions of the printed page (approximately 5 × 7- or 8 × 10-inch originals). Figures should be professionally drawn and lettering should be planned so that it will be legible after a reduction of 50 to 60%. Indicate in the margins where you would prefer to have the figures inserted. Illustrations in color can be accepted only if the authors defray the cost.

References. All references should be cited in the text by the author's surname and date of publication, e.g., Smith and Jones (1984) or (Smith, 1984) and typed double-spaced. All references should be listed at the end of the article in alphabetical order by authors' surnames. Abbreviations of journal titles should conform to general usage in economics. The following reference styles should be used in the reference list.

Desai, Padma, Ed., *Marxism, Central Planning, and the Soviet Economy.* Cambridge, MA: MIT Press, 1983.

Ericson, Paul G., and Miller, Ronald S., "Soviet Foreign Economic Behavior: A Balance of Payments Perspective." In *Soviet Economy in a Time of Change,* Vol. 2, pp. 208–244. Comp. of Papers, Joint Econ. Comm., U. S. Congress. Washington, D. C.: U. S. Govt. Printing Office, 1979.

Furubotn, Eirik G., and Pejovich, Svetozar, "Property Rights and Economic Theory: Survey of Recent Literature." *J. Econ. Lit.* **10,** 4:1137–1162, Dec. 1972.

Swain, Nigel, "The Evolution of Hungary's Agricultural System since 1967." In Paul Hare, H. Radice, and N. Swain, Eds., *Hungary: A Decade of Economic Reform,* pp. 225–251. London: Allen & Unwin, 1981.

Proofs. Proofs will be sent to the Author. Authors are responsible for correcting the proofs of their article. Authors will be charged for changes (other than corrections of printing errors) in excess of 10% of the cost of composition.

Reprints. Reprint order forms will accompany the proofs. Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased from the Publisher.
